Tract Description:

The topography varies from gently rolling to generally flat and based on the USDA Web Soil Survey the various soil types have an average site index for loblolly pine of 90 feet (base age 50). *This tract contains mature natural timber with the exception of an estimated 75 acres that were planted in the 1st Q 2016 with loblolly pine (ArborGen AGM-115). There is timber marked in Blue Paint east of the old tram that was never sold.*

Tract #2 – This property can be accessed from the south via a private gravel road. The topography varies from gently rolling to generally flat and based on the USDA Web Soil Survey the various soil types have an average site index for loblolly pine of 90 feet (base age 50). *This tract contains mature natural timber with the exception of an estimated 120 acres that were planted in the 1st Q 2024 with loblolly pine (ArborGen AGM-147).*

Tract #3 – This property can be accessed from the northwest & southeast via unimproved roads. The topography varies from gently rolling to generally flat and based on the USDA Web Soil Survey the various soil types have an average site index for loblolly pine of 94 feet (base age 50).

Tract #4 – This property can be accessed from the south via an unimproved road. The access route runs through the side of a yard before entering the woods and then providing access to the land. The topography is generally flat and based on the USDA Web Soil Survey the various soil types have an average site index for loblolly pine of 99 feet (base age 50).

Tract #5 – This property can be accessed from the south via an unimproved road. The topography is primarily gently rolling and based on the USDA Web Soil Survey the various soil types have an average site index for loblolly pine of 84 feet (base age 50).
